

BOARD OF LIGHT AND POWER GRAND HAVEN, MICHIGAN

SUBJECT: **Temporary Service**

POLICY: **Temporary Service**

PROCEDURE:

I. General

- A. Customers desiring general secondary service for a short time only, normally less than six (6) months, or a temporary service (as determined by the BLP) such as for construction jobs, traveling show, outdoor or indoor entertainment or exhibitions, etc., shall pay the charge per customer per month provided in the BLP's applicable rate. The customer shall furnish a suitable support for the metering.
1. All temporary services will be metered unless otherwise authorized by the BLP. The customer shall be required to deposit with the BLP an amount to cover the cost of installing and removing these temporary facilities plus a security deposit.
  2. The BLP will provide at no charge to a customer one span of overhead secondary and a service drop in order to provide construction power to a site. However, a deposit and connection fee must be paid prior to the installation of the service.
  3. In cases where no transformation exists to provide temporary power, the customer will be charged the labor and incidental material costs to install and remove an overhead transformer to provide temporary service (see Temporary Service Schedule of Fees).
  4. In cases where the BLP must construct a temporary line in excess of one span in order to provide service, the customer will be charged all installation and removal costs associated with the erection and removal of the temporary line.
  5. In cases where a developer needs temporary power to a facility that will eventually be served from an underground system; if the developer so desires, the temporary power may be served from the permanent transformer if the conduit and related equipment have been installed.
  6. All installation costs will be estimated prior to actual installation and the customer is to make a deposit equal to the total estimate with the BLP prior to said installation of the service. The customer will be billed only the actual final cost incurred for the installation. Cost under runs will be refunded to the customer, likewise, cost overruns will be invoiced to the customer.
  7. All temporary services must be constructed to minimum standards as approved by the BLP and shall comply with National Electric Code and/or local electrical codes whichever governs.

Adopted By The Board Of Light & Power On August 23, 2001

Effective September 1, 2001

BOARD OF LIGHT AND POWER  
 TEMPORARY SERVICES
